YOUR HEALTH

Editor, Journal of the American Medical Association, and of Hygiene, the Health Magazine

FBI Stomach to Keep Gallbladder Working

You may want to miss a meal to give your stomach a rest, but at the same time you may not be doing your gallbladder any good.

The reason for this is that, whenever food is eaten, especially fatty food, the gallbladder empties, and it isn't good for your health to keep that organ filled too long. In fact, you should eat something at least three times a day, to keep the gallbladder functioning well.

It has been said that the most common cause of disorders of the stomach is the disease of the gallbladder.

If you have a sense of fullness and discomfort of the abdomen, and you feel a good deal after eating, the gallbladder is no doubt responsible. Some relief is felt after belching, but you usually swallow some air when doing so, and this brings about greater discomfort.

Highly seasoned, fatty, and greasy foods seem to make the gallbladder disturbances worse.

Pain from a gallbladder disturbance is usually beneath the ribs in front at the top of the abdomen, and radiates to the back and up to the right shoulder. If there are gallstones which block the gallbladder, the pain may be severe and, in fact, it may cause the person concerned to bend over with the pain.

Inflammations of the gallbladder also bring about disturbances elsewhere in the body. Headache is a common symptom. Dizziness may be associated with the headache.

People with chronic inflammation of the gallbladder are irritable and nervous, and their sleep is disturbed. The yellow complexion, "yellow eye" and sallow appearance are typical of gallbladder inflammation.

When jaundice appears, it usually shows itself first in the whites of the eyes. Then the skin becomes yellow. Itching is a common symptom associated with jaundice and it may be so severe that the skin will be scratched and bruised, to control the itching.

Modern surgery has been able to develop methods for removing the gallbladder completely without harm. Certainly if there are gallstones present, and if there is accumulation of the symptoms that have been mentioned, delay will be dangerous.

One of our greatest surgeons has said that carrying around a gallbladder full of gallstones is like packing a stick of dynamite into the back pocket.

A BOOK A DAY

By BRUCE CATTON

A Five-Year Hike Across the Arctic.

When press dispatches announced last spring that agents of the Lomen Reindeer Corporation had herded some 2500 reindeer all across Alaska and delivered the into the Canadian government at the mouth of the Mackenzie river, it was easy to guess that a whole lot of a story must lie back of the achievement.

The guess was entirely correct. Max Miller has told the story—and told it exceedingly well, too—in "The Great Trek," revealing in an one of the most amazing exploits in the history of the Arctic.

Ten Eskimo and Lapp herders under an Arctic veteran named Andrew Bahr did the job. They expected it would take a year and a half; it took five years.

The men and their reindeer endured temperatures of 50 below zero. They had all the troubles familiar to readers of Arctic tales, and many new ones peculiar to their own job.

Taking reindeer on a long hike like this seems to be not unlike the task of a man who undertakes to roll a dozen peanuts to the top of Pike's peak with the tip of his nose. Reindeer scatter and stampede. The homing instinct is strong in them, and now and then they just pick up and decide to go back to the scenes of their childhood.

When this mood seizes them in the midst of an Arctic blizzard, in the dead of a frozen night—well, you can have the job of herding that sort of reindeer. Mr. Miller has written this story in his usual quiet, unemotional style and

has made a remarkably interesting tale of it.
Published by Doubleday, Doran and Co., it sells for \$2.50.

YOUR CHILDREN

By Olive Roberts Barton

Parents' Efforts to Deceive Bewilder Their Children

Mrs. Smith said, "What a lovely sofa. Mrs. Brown," as the two men lifted the new furniture from the van and carried it into the Brown house. "I think it is," remarked Mrs. Brown proudly, "and cheap, too, at a hundred dollars."

Jimmy, who had been toiling around in the grass, screwed up his face and said to his mother, "Say, mom, it was only sixty dollars, wasn't it? I thought you said sixty dollars."

His mother smiled indulgently. "No, dear, that was that other green sofa you and I were looking at. Don't you remember?"

Something in his mother's voice warned the child. "Oh, yes, I guess so," he agreed reluctantly. He ran off to play then, but every little while he looked back at his mother. He was sure she was right. Why did she want to tell people stories? What was the difference about the old thing cost, anyway?

Another Fall From Grace

That evening his parents dressed to go out to dinner. The Smiths came over to get them and were standing in the living room when Mrs. Brown came downstairs.

"What a pretty dress," said Mrs. Brown. "I want a black velvet terribly myself."

The Smiths were recent to the community so Mrs. Brown said, "It isn't new. I've had it for some time."

"Say, mom," interrupted Jimmy, "wasn't that the one Aunt Jane sent you the other day?"

"Why, darling, no." And then his mother explained something or other about asking her sister for extra velvet she wasn't using to make sofa pillows.

Jimmy felt most uncomfortable. It was awfully funny about the way his mother was forgetting things these days. She never used to forget. Just since they had moved here had she said and done funny things. She said to the lady at the store that she would love to join the garden club because she had left such a gorgeous garden at the other house. And it wasn't their garden, but the Watsons' next door she must have been talking about.

Confession Clears Away Doubts

He loved her so and anyone he loved he hated to be so puzzled about her. She seemed to be a different kind of mother from the one he had known so long all that time daddy was out of work. Now she was always telling him not to contradict her.

He happened to be awake when they all came home. He could hear them talking downstairs. His mother was saying, "Alice," so she was calling Mrs. Smith "Alice," so she was. "I fibbed about that sofa and about this dress. It has been on my conscience all evening. That sofa was sixty dollars and this dress was my sister Mame's."

"Good for you," came Alice's voice. Then ensued other confessions. Jimmy smiled and went to sleep at once. This was more like it.

GLORIFYING YOURSELF

By Alicia Hart

Work Irregular Lines of Face Into Oval.

"Besides planning your coiffure to improve the outline of your face work on your muscles to sculpture them in a smooth oval," advises Dorothy Cocks in her new book, "Help Yourself to Beauty."

"Knead and model your cheeks upward from the chin. Place your thumbs under your jawbone on each side of the chin, and pinch deeply, with thumb and first finger, outward along the jaws to the ears. Pinch away the fat that makes your facial oval too heavy here.

"Use the back of your hand to pat upward against your chin to break down the fold of fat that settles under your chin and spoils the oval of your face. Good posture, with head back, helps to create a good chin and throat line."

the curve of the forehead into your nose always is an important detail in the modeling of your face. Stray hairs that grow between brows should be tweezed. Cream should be patted on across this space every night. One should remember never to frown, as this often causes faint lines that eventually turn into deep furrows.

Don't forget to cover neck and face with cream before you start any kind of modeling or slapping routine. This way, you run no risk of stretching or irritating your skin.

When you have cleaned your skin, with soap and water, smooth on a layer of rich cream. Then start to mold and pat your chin and face. Afterward, remove the cream and finish with plenty of ice water.

The GOLDEN FEATHER

by Robert Bruce © 1935 NEA Service, Inc.

REGIN HERE TODAY
JEAN DUNN, secretary to DONALD MONTAGUE, lawyer, delays her answer when BOBBY WALACE, young automobile salesman, asks Jean to marry him.

At the Golden Feather night club Jean meets SANDY HARRIS, whose business connection is vague. She also meets LARRY GLENN, federal agent. Larry is trying to locate WINGY LEWIS, Bobby's arrange to sell some bonds for Lewis. He tells them to Jean's employer.

A few days later Sandy learns police are looking for him in connection with a robbery. He considers this to Jean and she goes with him to police headquarters to establish an alibi for him at the time of the holdup.

Sandy asks Jean to marry him. She tells him she is going to her home town for a vacation and will give him an answer when she returns.

NOW GO ON WITH THE STORY CHAPTER XV

It was just one week after this that Mr. Knuckles Welsh dropped dead.

Knuckles Welsh was technically unknown to fame, but his acquaintances was wide and varied. He lacked visible means of support, but he drove a 16-cylinder car and ate and drank—frequently—of the best. He drifted silently up and down the back ways of Dover, and although nobody had ever proved anything on him, which was his proudest boast, it was nevertheless common gossip that whenever an exceptionally raw deal was pulled off anywhere in the city Knuckles Welsh would be found to have drawn cards in it somewhere, if you could only trace things far enough.

Rumor, busy on many things, may have wronged him here and there, although it is not very likely, but at any rate, among the things rumor said about him was that he was Dover's unofficial chief of police. He had never in his life held any elective or appointive office—nor, for that matter, had he ever done any honest labor—but he held a wide and mysterious influence among people who did, and he found it lucrative.

The money that reached him in these ways went to various destinations, but a good share of it remained in his possession, so that when he was at last, and unexpectedly, gathered to his fathers, he left quite an estate. Furthermore, his domestic affairs having got rather tangled during two decades of gay living, this estate was left in a badly jumbled condition. So jumbled was it, in fact, that the court had to appoint officers to see just what was what and who was to get it.

It was for this reason that a certain safety deposit box which he had rented came to be opened under circumstances quite different from anything he would have desired.

THE men who had been appointed to appraise and conserve his assets looked at the different things they found in the box with varying stages of interest. And at last one of them pulled a scratch pad over to his side, scribbled down some notes, and then reached for a telephone.

He called the number of Dover's largest bank, and when he got it he said, "Let me talk to Mr. Hughes in the bond department."

And when Mr. Hughes got on the wire he said, "Hughes—this is Bert Thompson. I've got some bonds here and I think there's something phony about 'em somewhere. Can you give me a report on 'em?"

"Then he probably got them just recently?"

"Undoubtedly. I'd say within the week, most likely."

Larry looked thoughtfully at the sheet of paper.

"That's a pretty good-sized wad," he said at last. "These bonds have a face value of \$14,500. What's more, they're within a few points of par right now. Unless the man who gave them to him was pretty hard pressed, they must have changed hands at within a couple of thousand or so of their face value."

He paused, and there was a little silence. Then he went on: "Listen, Mike. Have you got

FIRST DOWN -AND THEN SOME

BY HARRY GRAYSON

Good punters are scarcer than ever but this condition has been coming on for a number of years.

There is a reason for it. Everything can be traced to its source, and the shortage of skillful kickers and the dearth of topnotch baseball players is due to the same cause—changes in the habits of small boys.

A few years ago every kid had a bat, a baseball, and a uniform of some sort. He knew how to hit behind the runner and hook slide in grammar school. Now, during the summer months, a great majority of youngsters play soft ball or tennis, caddy, or at fishing.

Young America forsook the so-called national pastime to such an alarming extent that the majors backed American League tournaments to encourage development of new talent. Major league clubs had to subsidize minor league outfits to keep the structure of organized baseball intact, and to preserve some kind of a steady flow to material.

Why Is It Called Football?

Kicking has suffered a similar decline. Small boys do not kick a football as much as they did in the past. Observe any group of young football players warming up and it immediately will become obvious that the ball is thrown much oftener than it is kicked. Drop-kicking and place-kicking are likewise neglected.

The outcome is that more boys can pass better than ever, but finished kickers are decreasing in numbers, despite the fact that skillful punting is just as vital to winning football as it ever was.

Even before all this lateral business you often heard the question, "Why do they call it football?" Nowadays, each college coach devotes a few precious minutes of each drill to having his entire squad toss footballs about, and the boys get up a line of chatter that makes them sound like a flock of baseball infielders at fielding practice.

Lateral passing is the weapon of the moment. Much concentration is being placed upon it. Its prominence brought about a ruling that the ball is not dead until the referee's whistle blows and that the ball can be thrown, even though forward progress has been stopped, provided the passer retains sufficient control of his body to do so.

Passers Must Call Shots

Down field lateral passing requires poise, balance, and control to be successful and if resorted to promiscuously will prove the downfall of many teams. If not successful, it means loss of the ball. If thrown the least bit forward the ball is brought back to the spot of the previous down and all the ground gained previously is lost.

Many players will endeavor to throw the ball to a teammate when tackled regardless of their ability to do so with

SO THEY SAY

We seem forced to admit that the settlement of international controversies through peaceful means is a long way off.—Senator Borah.

Selfishness and self-centeredness are the greatest enemies of human progress. He who thinks only of himself is hopelessly uneducated, no matter how thoroughly instructed he may be.—Dr. Nicholas Murray Butler.

We believe if crime prevention starts in the high chair there will be no electric chair.—Mrs. Francis H. Balke, head of New York Parent-Teachers Association.

This is not a machine age. Machines don't grow on trees or bushes. This is a great man age, and the machines are the evidence.—Thomas J. Watson, executive, International Chamber of Commerce.

Business conditions in our nation could be better and why shouldn't we profit by the (Italo-Ethiopian) conflict? Sales of supplies might reduce unemployment and ease our present depression.—Gov. J. M. Fretwell, Arkansas.

The swastika was originally used some time before the 13th century B. C. by a country in Asia Minor. This sun symbol is variously named "Fly-Foot-Cross," "Svastika," and "Gammadion."

a resultant loss of yardage, or the ball, in many instances.

Lateral passing, like forward passing, can only be used to advantage on the basis of strong fundamental strength. However, the more the ball is thrown the greater the delight of the spectators, regardless of its real help to the club using it.

Colgate, Columbia, and Ohio State made more profitable use of the lateral pass in 1934 than any other outfit, but their good fortune with it was founded on hard charging lines and powerful backfields, not on wild, promiscuous ball throwing that depends on chance for its success.

Other outstanding arrays, such as Minnesota and Pittsburgh, used the lateral sparingly, and did not neglect other departments of the game, especially not kicking.

Still Coughing?

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion.

Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

A 60-year-old native of Bosnia is said to be the world's smallest man. He is only 19½ inches tall, runs a farm, and has refused tempting "side-show" offers.

Home Clubs

Hopewell.
The October meeting for the Hopewell Demonstration club was held on Monday afternoon, October 14, at the home of Mrs. Homer and Chas. West. The meeting was opened by the secretary, Miss Olyn Osborne and Miss Vera Fowler gave a pretty devotional followed with a prayer by Mrs. Fowler.

During a short business period at which time a committee was appointed to meet with the Allen club and discuss the council meeting which is to be held at Hope in December. The committee: Mrs. Anderson, Mrs. Chas. West and Miss Olyn Osborne.

Nineteen members answered the roll with reports of their month's work.

The November meeting will be at the home of Mrs. Clifton Breed. Don't forget to bring scissors, thimble, thread and needle.

Following the meeting the hostesses served delicious pineapple cake and hot coffee.

An award of \$10.00 was paid Sioux Indians on the Rosebud reservation at Rapid City, S. D. last year for ponies stolen by white men 60 years before.

Benediction

Age comes so pleasantly to folk who wait it.

Between wide walls where they have dwelt in peace.

Age comes with friendly smile and charming gesture.

Bearing no sadness—only a release from the uncertainty of toil and tumult.

From hate and passion, and from fear and pain.

Age comes so gently to the folk who wait it.

Beneath a roof that has known sun and rain.

When rooms are filled with dear familiar shadows.

When windows show a tranquil countryside.

How can there be a dread of broader vistas.

Of spaces that are new and untried? When stairs have echoed to contented laughter.

When doorills show the mark of many feet—

There is a quiet thrill to growing older.

A climax that is very kind and sweet.

—Selected.

Mr. and Mrs. W. J. Shriver of Chicago, Ill., arrived Thursday night for a visit with Mrs. Shriver's brother, John Shriver and Mrs. Shriver.

Old friends will remember Mrs. Shriver as Miss Florence Siver, formerly of this city.

The Clara Lowthorp chapter, C. of C., held its October meeting Thursday afternoon at the home of Miss Frances Snyder.

With Miss Mary Haynes as joint hostess, Miss Evelyn Bryant, president, opened the meeting.

The minutes were read by Miss Catherine Lane, 22 members responded to the roll call, with one visitor.

The following interesting program with "The Life of Maury" by Miss Katherine Mae Simms, "Noted Southern Men of Today," by Miss Dorothy Gunter, followed by a vocal selection "Blue Moon" by Miss Mary Urban, closing.

Misses Sibyl Williams and Martha Martindale will see the game between Henderson State Teachers and Monticello A. & M., played in Arkadelphia, Friday night.

Mr. and Mrs. E. C. Sterling will spend the week end with relatives and friends in Shreveport, La.

The Woman's Christian Temperance Union held a most interesting and enthusiastic meeting Thursday afternoon at the home of the president, Mrs. Edwin Dosselt, with Mrs. A. C. Andres and Mrs. Guy Holt as associate hostesses.

The devotional was given by Mrs. Dosselt, who used as her theme, "The Forgotten Man and Christ," followed by an unusually helpful and comprehensive paper, entitled, "No Man Liveth to Himself," by Miss Georgia Lewis.

"The Toll Accidents and How They Affect the Professional World," was discussed by Miss Mamie Twitcheell.

A resume of the banquet address given at the W. C. T. U. national convention in Atlantic City, was given by Mrs. Guy Holt.

Following the program delicious refreshments were served to 14 members and two visitors.

Edwin Dosselt was a Thursday visitor in Shreveport, La.

Mr. and Mrs. Royce Wisenberger of Marshall, Arkansas, formerly of this city announce the arrival on October 15 of a 7 1/2 pound daughter, who has been christened Frances Lucretia.

Mrs. Gwendolyn Alnstead, R. N., of Heber Springs is nursing the mother and daughter, who are reported as doing nicely.

The many friends of Mrs. T. L. Hockersmith Jr. of Benton will be pleased to learn that she is reported as doing nicely following a major

operation at Julia Chester hospital.

Mr. and Mrs. Clarence Barnes announce the arrival of a daughter born October 17, weighing 7 1/2 pounds.

with "Contemporary Writers," by Miss Wanda Keith. During the business session, the United Daughters of the Confederacy national convention to be held in Hot Springs in November was discussed, as the chapter plans to attend the convention as guests. At the close of the business period, Miss Nell Williams, visitor, entertained the chapter with a group of popular piano selections, while the hostesses served delightful fruit punch and cookies.

Miss Katherine Bryant was hostess to the members of the Thursday night bridge club and a few special guests at her home on South Main street.

The Halloween motif was carried out in the decorations, bridge accessories and refreshments. Mrs. Frank Drake won the club prize and the guest favor went to Mrs. Lawrence Martin.

Following the game, the hostess served a delightful ice course with cake.

Mr. and Mrs. M. M. McCloughan have as house guests, Mr. and Mrs. E. E. McCloughan and Mrs. Stella Pate of Oklahoma City, Okla. Mrs. McCloughan and her guests will spend Saturday with relatives and friends in Texarkana.

The meeting of the Woman's Auxiliary of the First Presbyterian church has been postponed until Monday, October 28, on account of the School of Missions at the church on Monday October 21.

Misses Sibyl Williams and Martha Martindale will see the game between Henderson State Teachers and Monticello A. & M., played in Arkadelphia, Friday night.

Mr. and Mrs. E. C. Sterling will spend the week end with relatives and friends in Shreveport, La.

Weekly Sunday School Lesson

The Message of Jeremiah

Text: Jeremiah 7:1-11, 21-23

The International Uniform Sunday School Lesson for October 20.

By WM. E. GILROY, D. D.

Editor of Advance

What message did Jeremiah have, as he stood to proclaim the prophecy of God in a situation as dark as has ever confronted a people brought low by their own sinfulness and disregard of God?

First of all it was a message of repentance. "Amend your ways and your doings."

There can be no health or safety while men or peoples are pursuing a wrong or evil way. Turning toward the right from the wrong is the first step in all salvation, individual, national, or social.

With this repentance must come a regard for truth. "Trust ye not in lying words," says Jeremiah; and it is notable that he says this to those who are entering the gates of the temple to worship.

Jeremiah denounces particularly those who turn religion to their own ends, instead of rectifying their lives by the truth of religion. One recalls Abraham Lincoln's saying that he was much more concerned about being on God's side than about calling on God to support his side.

Jeremiah is specific in what he means by amending ways and doings. He tells the people plainly that it means thoroughly executing justice between man and man.

It means that there must be no oppression, that there must be regard for the fatherless and widows, that there must be no blood guiltiness through acts of violence, and that there must be no turning to false gods.

"Will ye steal, murder, and commit adultery, and swear falsely?" asks Jeremiah. And he charges that those who have done these things have come and stood before the altar, calling upon God as if they had done no wrong.

He asks, in words that have become prophetic for every age, whether the house of God is to be made a den of robbers.

These words should bite into our minds and hearts. They remind us that the institutions and offices of religion may become instruments of wrong and oppression, instead of the inspiration and means of right.

We should like to think that the institutions of religion have improved, that our churches and great organizations are attuned to truth and righteousness and social justice.

There are widespread evidences that this is the case. But the prophecy of Jeremiah reminds us how, even in the church itself, eternal vigilance and continual heart searching and consecration are the only means by which religion may be kept true alike to God and humanity.

Churches, however, consist of the people who belong to them. There can be no mass institution of power where the individual members are not wise and zealous in their faithfulness to God and in their readiness to uphold the works and purposes of love.

Rightly seen, Jeremiah is not a prophet of inspiration and help, because he dares to penetrate through dark situations and reveal the way of light and hope.

It is the man who dares to face wrongs and right them, who is the true man of faith and optimism.

operation at Julia Chester hospital.

Mr. and Mrs. Clarence Barnes announce the arrival of a daughter born October 17, weighing 7 1/2 pounds.

with "Contemporary Writers," by Miss Wanda Keith. During the business session, the United Daughters of the Confederacy national convention to be held in Hot Springs in November was discussed, as the chapter plans to attend the convention as guests. At the close of the business period, Miss Nell Williams, visitor, entertained the chapter with a group of popular piano selections, while the hostesses served delightful fruit punch and cookies.

Miss Katherine Bryant was hostess to the members of the Thursday night bridge club and a few special guests at her home on South Main street.

The Halloween motif was carried out in the decorations, bridge accessories and refreshments. Mrs. Frank Drake won the club prize and the guest favor went to Mrs. Lawrence Martin.

Following the game, the hostess served a delightful ice course with cake.

Mr. and Mrs. M. M. McCloughan have as house guests, Mr. and Mrs. E. E. McCloughan and Mrs. Stella Pate of Oklahoma City, Okla. Mrs. McCloughan and her guests will spend Saturday with relatives and friends in Texarkana.

The meeting of the Woman's Auxiliary of the First Presbyterian church has been postponed until Monday, October 28, on account of the School of Missions at the church on Monday October 21.

Misses Sibyl Williams and Martha Martindale will see the game between Henderson State Teachers and Monticello A. & M., played in Arkadelphia, Friday night.

Mr. and Mrs. E. C. Sterling will spend the week end with relatives and friends in Shreveport, La.

The Woman's Christian Temperance Union held a most interesting and enthusiastic meeting Thursday afternoon at the home of the president, Mrs. Edwin Dosselt, with Mrs. A. C. Andres and Mrs. Guy Holt as associate hostesses.

The devotional was given by Mrs. Dosselt, who used as her theme, "The Forgotten Man and Christ," followed by an unusually helpful and comprehensive paper, entitled, "No Man Liveth to Himself," by Miss Georgia Lewis.

"The Toll Accidents and How They Affect the Professional World," was discussed by Miss Mamie Twitcheell.

A resume of the banquet address given at the W. C. T. U. national convention in Atlantic City, was given by Mrs. Guy Holt.

Following the program delicious refreshments were served to 14 members and two visitors.

Edwin Dosselt was a Thursday visitor in Shreveport, La.

Mr. and Mrs. Royce Wisenberger of Marshall, Arkansas, formerly of this city announce the arrival on October 15 of a 7 1/2 pound daughter, who has been christened Frances Lucretia.

Mrs. Gwendolyn Alnstead, R. N., of Heber Springs is nursing the mother and daughter, who are reported as doing nicely.

The many friends of Mrs. T. L. Hockersmith Jr. of Benton will be pleased to learn that she is reported as doing nicely following a major

operation at Julia Chester hospital.

McNaught, Dragon Wrestle to Draw

Joe Woods Takes Two Out of Three From Speedy Schaffer

Scotty McNaught, scientific Canadian, was forced to rough it up a bit to get a draw with the "Black Dragon" in the 45-minute preliminary at the American Legion wrestling arena Thursday night.

The Dragon, who has not lost a bout here since his appearance three weeks ago, took the first fall in 20 minutes with an old-fashioned back breaker.

The Dragon started the rough stuff in the second round and McNaught retaliated with punches to the face. The Dragon went down several times but managed to fight on until one minute before the bell, when McNaught pinned him.

With only a minute to go, the two grapplers returned to the ring, fists flew for a few seconds but time cut the match short.

Joe Woods took two out of three falls to win the final event from Speedy Schaffer. Woods was substituted for Bob Montgomery who was injured in a match Wednesday night and unable to appear.

Donald McNaught, younger brother of Scotty McNaught, acted as referee. Promoter Bert Maudlin announced from the ring that regular Thursday night programs would be changed to Tuesday night, effective next week.

Maudlin also announced that a wrestling battle royal, with five grapplers appearing in the ring at one time, would be a feature on the card next Tuesday.

Italians to Win

(Continued from page one)

guerrilla warfare in the Philippines, and the French much longer than they expected in Morocco. An air force is not of much value unless there is something to hit, and the Ethiopians are certain to scatter.

General Ely, a veteran of the Philippine insurrection, said Italy's chief problem in advancing in Ethiopia would be to protect its communications and line of supplies from Haile Selassie's guerrilla warriors.

"The allies learned in the World war not to go too far beyond their own artillery. The French and English got caught that way several times and soon found that the only thing to do was to drive in and consolidate."

"If Mussolini's troops do that, building roads and a system of blockhouses as they advance and keeping their air patrols going, they may not have a great isaster, although they can't prevent many small ones. But if some ambitious leader penetrates too far to quickly, they may have another Aduwa." (He referred here to the rout of Italian forces by Ethiopians at Aduwa 35 years ago.)

Commenting with a chuckle on reported desertions of Ethiopian troops to the Italian side, General Ely recalled how American troops frequently bribed Filipino insurgents to lay down their arms.

"We used to pay 'em \$15 for every rifle," he laughed, "and you'd be surprised how many we got. This looks like something of the same thing."

Worms comprise the entire diet of the Daoudas, a tribe in Libya. These people are said to be the lowest specimens of mankind.

Bloodhounds were known as stag-hounds until about a century ago. They owe their name to the fact that they are out for blood.

Two languages, Saxon and Norman French, were spoken in England for many years after the Norman conquest.

The gigantic soft drink trade owes its inception to a Philadelphia perfumer, who mixed fruit syrups with carbonated water.

We trust that we shall have a large attendance in our Bible School Sunday morning at 9:45, as we are planning a promotion day in the school.

During worship at 11 a. m. at which time the pastor will bring a message on "Love's Way." Evening worship at 7:30 p. m. sermon subject for this hour will be "Depart From Us."

Christian Endeavor at 6:45 p. m. for the Young People in the Church bungalow. Prayer meeting Wednesday night at 7:30 p. m. Miss Birdie Ray Ellis will be the leader. Choir practice Wednesday evening at 7 p. m. preceding prayer meeting.

We urge all our members to be present, and extend a hearty invitation to everyone to come and worship with us at one or all our services.

FIRST CHRISTIAN Guy D. Holt, Pastor

First Methodist Church Fred R. Harrison, Pastor

Church of Christ West Fifth and Grady Streets Glenn A. Parks, Minister

The first Sunday in November is the beginning day of our fall meeting. Sidney Kinningham of Marshall, Texas will do the preaching. Mr. Kinningham is a young man with a pleasing personality, and an interesting speaker. His messages will be enjoyed by those who hear them. Plan now to attend the meeting. We shall enjoy having you.

Services for this week will be as follows:

Sunday school 10 a. m.

Praying 11 a. m. and at 7:30 p. m. Subject for morning lesson, "Has Man a Choice?" Topic for evening sermon, "The Greatest Book."

The church extends a cordial welcome to you. Come and worship with us.

"Silver Streak" Pontiac Is Shown in Three Models

1936 General Motors Line
Includes "Eight," "Six,"
and "De Luxe Six"

TURRET STEEL BODY

Hydraulic Brakes and
Sealed Chassis Are
Among Other Features

Three lines of new Pontiac models for 1936, the straight eight, six and de luxe six, are now on public view in Pontiac dealers' showrooms throughout the country.

They set at prices which put them within the range of the lowest priced cars on the market.

The "silver streak" radiator and hood grille that formed the central design motif of 1935 and earned for Pontiac the descriptive characterization of the "most beautiful thing on wheels," continues as the basic theme with certain pleasing changes that reflect even greater refinement of taste and more artistic beauty than was expressed in the original.

Improvements included in the 1936 line are greater in number than they were for the 1935 models and fully as important to the motorist. Many of them are not as apparent at a glance as the boldly as Fisher turret top bodies, hydraulic, triple sealed brakes or the sealed chassis of 1935.

A close examination discloses that the Pontiac engineers have gone through the 1935 chassis and bodies, feature by feature, refining this one and perfecting that one, keeping in mind the comfort and convenience of

the motorist, and the economy, performance and safety of the car.

Nineteen Body Styles
The straight eight and de luxe six are available in six body styles each, while seven are mounted on the six chassis. Common to all lines are two-door and four-door touring sedans (with built-in trunk), all accommodating five passengers; the standard coupe for two passengers and the sport coupe for four passengers. The abbreviated built for four passengers is also available on the six chassis.

Many optional features are offered, with a wide variety of trims and finishes recently developed by Duco color engineers.

Probably the most striking change in external appearance is in the front end treatment, where the chromium grille has been crowned as it sweeps up over the radiator in an unbroken line, thus emphasizing speed and giving the impression of a longer, sleeker, faster and lower car, despite the unchanged wheelbases of 117 inches on the eight and 112 on the sixes.

New radiator ornaments are in the modern motif. Chrome trimmed brackets support the headlamps on the radiator shell. Further improvement in exterior appearance includes a more deeply crowned one-piece front fender sweeping down to the bumper level and all-rubber steel reinforced running boards. Rear fenders are more deeply crowned, with the rear half raked further back to a point below the wheel center. Rear lamps are mounted on the fenders. Rear bumpers are longer. Bumper ornaments are refined and smaller. All sheet metal is fully rust-proofed.

Yerger Is Honored
A holiday atmosphere prevailed Friday among the negro populace of Hope.

The occasion was the 50th anniversary as head of the Hope negro schools for Henry Clay Yerger, now 76, and one of Arkansas' most distinguished negro educators.

"I am indeed a happy man," said Yerger Friday morning as he sat in his flower-bedecked office at Yerger High School where congratulatory telegrams, letters and messages poured in.

The Yerger High School stage was lined with wreaths, many of them from life-long friends, both white and negro. Cards on the wreaths read: "Congratulations and best wishes," "Congratulations for a long and useful life of service," "Wishing you many more happy days—and many other messages of good cheer, and good health."

High officials in educational circles from Arkansas, Tennessee, Virginia, New York and South Carolina were here for the two day celebration which was to be climaxed with a program starting at 2 p. m. Friday in the Yerger High School auditorium. Attorney Steve Carrigan of Hope, will deliver the principal address. Among others on the program were: W. E. Phipps, state commissioner of education; Mayor Albert Graves, Joe R. Floyd of the Hope School Board; County School Examiner E. E. Austin; Leo M. Favrot, field agent of the General Education Board.

Fred McCulston, executive secretary of the Southern Association of Universities and Colleges of Nashville, Tenn.; Miss Willie A. Lawson of the Arkansas Educational association; J. B. Watson, president of Arkansas M. & N. College at Pine Bluff; Charles L. Williams, president of the Arkansas Negro Teachers association; Alberta

Clark, of Tuskegee Institute; Dr. B. C. Caldwell, retired representative of the General Education Board, and others. Other educators here for the celebration, but not on the program, included: Abram L. Simpson, president of Allen University, Columbia, S. C.; Louis H. Coggs, of the Arkansas State College, Pine Bluff; F. L. Dorman of Little Rock; A. M. P. Strong of the State Department of Education, Little Rock.

Ida Upchurch of the negro schools at Prescott; T. L. Ingram, Center Point, Ark.; W. T. B. Williams, Tuskegee Institute; S. F. Nelson of Camden; Lloyd Henson, Camden. The observance will be concluded with a reception Friday night at the Choever Street school, honoring Yerger and his wife, Ella, who has taught school 45 years.

Ethiopians Draw

(Continued from page one)

operation would be made only on condition that she be permitted to interpret the mutual assistance provision of the League covenant in her own way.

Premier Under Pressure
The premier was between two fires. If he gives Britain unqualified support the nation's nationalists will accuse him of "being tied to British constraints for war." If he should reject British demand, he would be accused of shirking France's obligations under the League covenant.

British officials here told M. Laval the French position in the Mediterranean would determine whether France could expect British and League aid in case of German aggression.

This brought the reply that the French "never have had British support on the continent," from Britain's failure to join in support of Polish independence against Russia to Britain's "tearing up" of the Versailles treaty by recognizing the Reich's naval rearmament.

The Turkish foreign minister, Rusto Aras, visited Laval and told him that Turkey will support sanctions against Italy and also will deny Mussolini's warships use of Turkish ports in case the Mediterranean becomes a war zone.

Deny Attack on British
KEILA, British Somaliland—(AP)—An unconfirmed report that British soldiers suffered casualties in a fight with Italian troops was brought here Thursday by tribesmen, but the report was denied in Rome and in London officials said they did not believe it. At the British Colonial Office an official said that the office was in close touch with Zeila and should have received any authentic report made there.

An Italian official called the report "absurd and false." Ethiopian officials were incredulous.

The camel corps in British Somaliland is made up of local native troops. Italian troops have been advancing to the northwest close to the border of British Somaliland.

Authorities said that if fighting occurred it would have been caused either by the Italians unintentionally crossing into British territory or by their mistaking the British corps for Ethiopian forces.

The border has never been defined continuously through the Ogaden desert wastes. The camel corps was sent to the frontier to prevent entrances of refugees from the war zone. Tribesmen said the Italian advance in Ogaden has been delayed because of rains which made it impossible for tanks to progress. They said five tanks bogged down near Udi.

Italians Reinforced
Fearing a threat to their left flank the Italians since Monday have been hurrying reinforcements from Italian Somaliland into Southern Ogaden, where the army of Ras Desta was reported continuing its movement down the Webbe Shibili river valley.

Somali runners arriving here from the frontier say Italian tanks have been unable to move through the marshy ground beyond the wells at Aurla Heigah and Agolah. The infantry behind the tanks was compelled to readjust its front line for the same reason.

The unexpected setback in the plans of Gen. Rodolfo Graziani was reported to have depressed his men, who had expected to make a swift and vic-

2 Women Contend Baby Is Their Own

Solomon's Story Is Being
Repeated Before Court
in St. Louis

ST. LOUIS, Mo.—(AP)—Two women claiming motherhood of the same baby Thursday heard indirect testimony that the child had been taken from one and given to the other.

Mrs. Nettie Beckerie, a disbarred lawyer, quoted Cecil Winner, son of a midwife, as having said he aided in moving a child born to Anna Ware in his mother's home to the fashionable residence of Mrs. Nellie Tipton Muech.

The testimony was given during a hearing on a habeas corpus petition brought by Miss Ware, an unwed Philadelphia servant girl, against Mrs. Muech.

Mrs. Muech, comely 42-year-old member of a widely known Missouri family, was acquitted two weeks ago of charges of kidnapping Dr. Isaac D. Keller, wealthy St. Louis physician,

torious dash across the waterless Ogaden country and to gain a foothold in the highlands to the north without serious opposition.

Sudden renewal of the rains was accepted by Ethiopians as a sign of Divine intervention. They have been praying for more rain.

Congress to Move

(Continued from page one)

ator Hattie W. Caraway said on her arrival here Thursday night from Jonesboro.

She will go to Russellville to attend the dedication of Caraway hall Friday, recently completed women's dormitory at Arkansas Polytechnic College, which is named for her late husband, Senator Thaddeus H. Caraway.

"The time has come when we may well study the issues before us with care before acting on them," she said. "The grave emergency confronting the administration made it necessary for much to be done in a comparatively short time last year and this, but circumstances now enable the congress to act more deliberately, and I believe this will be the tempo of the next session."

"I think we would have fewer reversals by the supreme court if more time and study were given to measures of great importance."

Mrs. Caraway said that all legislation affecting Arkansas and Arkansians will be her special concern during the coming months. She feels that consideration of Arkansas affairs is vital at a time when the national pattern is so profoundly affected by forces within and without.

Mountain lions and leopards have been crossed successfully.

Swiss Feel Nazi Hand

BERNE, Switzerland—(AP)—Active German Nazi organizations in Switzerland are worrying the authorities. Pressure is brought to bear on German residents, particularly in the Canton of Berne, official investigators reported. Another problem has been raised by the new Reich military service law, which enables Germans to become Swiss and remain German at the same time. To prevent this double nationality, modifications of the naturalization laws are being worked out by Swiss legal experts.

The titmouse, a bird, will snatch hairs from a man's head and use them in nest building.

The sale of charms is one of the principal means of income for Chinese priests. One of these charms is a drawing of a horse on a sheet of yellow paper, sold to parents who have sick children.

Picard Plans New Album
BRUSSELS—(AP)—Prof. August Picard, now on holiday in the Tyrol, is reported to be planning a new balloon flight to the stratosphere next spring starting from the shore of Lake Ossi in the Austrian province of Carinthia. His former companion, Max Cosyn, is studying the penetration of cosmic rays in underground caverns.

A tree 34 feet in diameter and estimated to be more than 3800 years old is believed to be the world's oldest. It is in Yosemite National Park. A silver-gray long-tailed Yokohama hen has a tail length of 15 feet.

1936 PONTIAC
Silver Streak
SIXES and EIGHTS

More beautiful than ever
and **BUILT TO LAST 100,000 MILES!**

A General Motors Value

ALL THAT'S BEST OF ALL THAT'S NEW

1. Solid Steel "Turret-Top" Bodies by Fisher
2. Improved triple-sealed hydraulic brakes with new chrome-nickel alloy drums
3. Enclosed Knee-Action on "s" and De Luxe "6"
4. Smoothest of "6" and "s" cylinder engines with silver-alloy bearings and full-pressure metered lubrication
5. Electroplated light-weight nickel-alloy pistons
6. All-silent Syncro-Mesh transmission
7. Simplified starting with automatic choke
8. Concealed luggage and spare tire compartment
9. New full-length water-jacketed cylinders
10. Even stronger double K-Y frame

YES, the new Pontiacs are actually even more beautiful than before, with a new front-end, new headlight mounting, a different hood, different running boards, and a decidedly different rear-end treatment. And that's only the outside story of the new Pontiacs. The inside story is even more remarkable. The 1936 Silver Streaks are built to last 100,000 miles.

The brakes are triple-sealed hydraulics with new warp-proofed drums of fused iron on steel and molded linings. The bodies are solid steel "Turret-Top" Fisher Bodies with No-Draft Ventilation, insulated roofs, and built-in luggage and spare tire compartments. Clutch, brakes, and engines are even smoother, while the Syncro-Mesh Transmission is silent in every speed. And the even more economical engines feature cooling and lubricating systems that are models for the entire industry!

These, of course, are merely the highlights of what awaits you at your Pontiac dealer. Be sure to get the rest of the story, including the startling facts about Pontiac's low prices.

1936 Ford to Be Displayed by Hope Auto Co. Saturday

Striking Body Lines Adopted, But No Radical Chassis Changes

A NEW FRONT END

Steel Wheels Lessen Unsprung Weight, Improve Riding Comfort

DEARBORN, Mich.—Ford V-8 cars for 1936 will be shown for the first time to the public Saturday.

Body lines which strike a new note in conservative streamlining, a new treatment of the interior and three important refinements in chassis engineering summarize the principal improvements in the 1936 car. There are no radical changes. The 85-horsepower V-8 engine, of which more than 2,000,000 are now on the road, is unaltered.

Of the three principal chassis improvements, one—improved steering—is aimed at greater ease and safety of operation. Two others tend to greater comfort. One is the use of new steel wheels which lessen the unsprung weight of the car and thus provide greater riding comfort. The other is an improved transmission, using quiet helical gears in all speeds, including reverse.

A new front end treatment gives added distinction to the body lines. The hood is longer, extending gracefully over the attractive new radiator grille. With its vertical slots and more accentuated "Vee" as well as its smoothly rounded lower edges which blends with the streamlined curve of the inner portion of the fenders, the new grille contributes a note of smartness which is distinctive and new.

Fenders are streamlined, a wide flare giving them an imposing appearance. Louvers are of new design. Horns are recessed in the fender aprons back of small round grilles beneath the streamlined headlamps. The latter are relatively small and parallel in section, finished in enamel to match the body color and set off by rustless steel rims.

The welded steel body is low and wide, with flowing rear quarter lines.

Family Car for Comfortable Touring

THE FORD V-8 Tudor Touring Sedan for 1936, illustrated above, provides easy riding comfort and plenty of room for the family. The built-in trunk is a great convenience on long trips, getting luggage out

of the way of passengers. The bucket-type front seats are restful and the rear seat is wide and roomy. The rustless steel running board moulding adds a touch of individuality.

Finish is a Ford-developed baked enamel. The new steel wheels with 12½-inch hub caps materially improve the appearance of the ensemble. Hub cap centers are of polished rustless steel.

13 Body Types
Thirteen body types are available, ten with de luxe appointments and three without. These are:

De Luxe: Three-window coupe, five window coupe, roadster with rumble seat, phaeton, cabriolet with rumble seat, convertible sedan, Tudor sedan, Fordor sedan, Tudor touring sedan and Fordor touring sedan.

Without De Luxe equipment: Five-window coupe, Tudor and Fordor sedans.

Five body colors are specified, Washington blue, Cordobatan, gray Vineyard green, gunmetal and black. The de luxe body types are available in any of the five colors, with fenders matching and wheels in a harmonizing color. The cars without de luxe equipment, the Tudor, Fordor and the five-window coupe are available in black and in gunmetal with fenders matching the body color and wheels in black.

Interiors of the new cars, especially luxurious in the de luxe types, reveal a distinctly modern treatment. The color motif is a rich gray, with which the tape of the upholstery fabrics harmonizes.

The passenger space is commodious, unusual roominess being provided for by the location of the V-8 engine forward over the front axle. Additional elbow room in the back seat of the Fordor and Fordor touring sedans is furnished by recessed arm rests. The Tudor sedan types have form fitting individual front seats. All driver seats in closed cars are adjustable.

Seat cushions are deeply pillowed and set off with new piping. Mohair, broadcloth or Bedford cord are optional in the de luxe sedans; Mohair, or broadcloth in the de luxe coupes; wide wale Bedford cord only in the types without de luxe equipment. Seat cushions in the cabriolet and convertible sedan are in genuine leather or Bedford cord; the seat cushion in the roadster and those in the phaeton are of genuine leather.

New Instrument Panel
All instruments are of new design to conform to the modern effect of the instrument panel, which has a center decorative scheme of chromium strips, in the de luxe types. De Luxe car panels are fitted with 100-mile speedometer, with trip mileage recorder; ammeter, water temperature indicator, electric fuel gauge and electric oil gauge, as well as a cigar lighter, tilting ash tray and glove compartment. The ash tray may be removed and a Ford radio installed upon special order. The attractiveness of the interiors is also enhanced by more ornamental door and window mouldings and new style hardware. Mouldings and instrument panel in all cars are finished in gray metallic pyroxylin.

De luxe types have rear seat arm rests, dome light, two swinging type sun visors and an arm rest on the left front door for the convenience of the driver. Fordor types and the convertible sedan have robe rails and rear compartment foot rests. All sedan types have ash trays in the rear compartment. All body types are equipped with rearview ventilation. Safety glass is standard in windshields and all doors and windows.

Ample luggage space is available in all body types. In the sedans the rear seat swings forward and down disclosing a roomy compartment in which

two suitcases and an overnight bag or other luggage may be stowed. The touring sedans have a fitted trunk built integral in the rear deck. The coupes, cabriolet and roadster have a large parcel shelf in the rear of the seat, as well as ample space in the rear deck.

17-to-1 Steering
Substantial improvements have been made in the steering mechanism. The steering gear ratio has been increased from 15-to-1 to 17-to-1, and the front axle steering arm lengthened, thus stepping up the leverage exerted by the wheel some 13 per cent and reducing in proportion the effort required for control of the car.

A second important change is the use of straight needle roller bearings on the steering arm sector shaft. With this addition all bearings in the gear are of the anti-friction type. To ease operation still further, the worm and sector teeth are now ground and lapped. Friction in the gear thus has been virtually eliminated.

An adjustable drag-link also has been incorporated in the steering mechanism. This permits the "high spot" in the gears to be set in the "straight ahead" position. The high spot is a point on the sector where the gears fit a little closer than elsewhere. The purpose of this is to eliminate play in the steering when the wheels are in the straight-ahead position, while still permitting utmost ease in making turns. It is estimated the effort required in steering has been reduced more than 25 per cent, as a result of these improvements.

The new transmission changes mark another substantial improvement in chassis engineering. Helical gears are now fitted in low and reverse speeds, in addition to second and high, providing quiet operation in all speeds. Synchronization is retained between second and high speeds to prevent gear clashing when shifting between these speeds, either up or down.

Gear shifting is made easier by reducing the amount of travel of the gear shift lever necessary for moving between neutral and any speed. The shape of the lever has been changed to permit more room for a third front seat passenger and to provide greater ease in shifting.

The mechanical type brakes are considered by engineers to be best for a chassis of the Ford V-8 type with torque-tube drive and radius rods to hold the axles firmly in place under all conditions. Brake shoe surfaces have an area of 186 square inches and the braking effort obtained in relation to car weight is at maximum.

The new steel wheels possess many important advantages. The wheel comprises a drawn steel spoke section electrically welded to the rim, forming a single steel unit of exceptional strength.

Although as strong and rugged as the former one-piece steel spoke wheel the new wheel is nearly five pounds lighter—a total of almost 20 pounds for the chassis—effectively decreasing the total of unsprung weight and increasing the degree of riding comfort. The new wheels are more easily cleaned.

Although no changes except in manufacturing fitness have been made in the V-8 engine, the cooling system has been improved and its capacity increased to provide adequate cooling under exceptional operating conditions.

Aside from these improvements the chassis is unchanged, its most important feature being the proper combination of three important engineering principles of design to provide what is termed the "center-poise" ride.

These are improved spring suspension, correct car balance and proper passenger weight distribution. Other features include a double-drop X-type frame, with X and side members forming box sections extending to the end of the frame; flexible transverse springs perched forward of the front axle and back of the rear axle, on the 112-inch wheel base, providing in excess of 123 inches spring base; easy clutch with application assisted by centrifugal action and having small roller bearings in the throw-out levers; radius rods and torque-tube drive; three-quarter floating rear axle, with straddle mounted pinion; and double-acting shock absorbers.

Spice Meals With Surprises in Food Preparations.

BY MARY E. DAGUE
NEA Service Staff Writer

If I were a magician, I'd make a chart of meals that would turn out a totally different dinner 365 times a year. Since I'm not a magician, I can only advocate over and over again intelligent seasoning, varied ways of cooking the same things and the wise use of substitutes.

If food that usually is served on a platter comes to the table in a baking dish interest is aroused, don't you think? Meal baked with clever seasoning has an entirely different flavor than the same meat fried or even broiled.

Surprise the family by omitting potatoes and serve a creamy rice pudding for dessert.

It isn't necessary to serve expensive, out-of-season foods to have different meals. The good root vegetables such as carrots and turnips are savory and appetizing and the finest chefs in the land appreciate and make full use of the full-flavored onion.

Baked Steak

One and one-half pounds sirloin steak, 4 medium sized carrots, 2 teaspoons salt, ¼ teaspoon pepper, 4 good sized onions, 2 small turnips.

Trim steak and dredge with flour. Put in a baking pan and cover with

carrots and turnips which have been pared and cut in dice. Sprinkle with salt and pepper. Pour a few tablespoons of water over vegetables. Bake in a moderate oven for forty-five minutes. Peel onions and cut in halves. Dip in melted butter and arrange over vegetables and meat. Continue to bake forty-five more minutes or until steak and vegetables are tender. Sherve from baking dish.

Of course you can use any combination of vegetables you may prefer but don't forget the onions because they add so much to the savorness of the dish. A can of tomatoes poured over the steak when it's put in the oven is another way to vary the concoction.

If you want to sprinkle a cup of grated cheese over the whole thing about ten minutes before sending to the table—just long enough to melt the cheese—you have something else again.

Tomorrow's Menu
Breakfast: Grapes, cereal, cream, creamed dried beef on toast, milk, coffee.

Lunch: Surprise baked potatoes, celery hearts, baked pears, ginger cookies, milk, tea.

Dinner: Tomato juice cocktail, baked steak with vegetables, head lettuce with Thousand Island dressing, creamy rice pudding, milk, coffee.

Creamy Rice Pudding
Two cups milk, 3 tablespoons rice, ½ teaspoon salt, 4 tablespoons sugar, 1 vanilla bean or 1 tablespoon vanilla, 1 tablespoon butter.

Wash rice. Mix ingredients and pour into a buttered baking dish. Bake three hours in a lo woven (352 degrees F.). Stir three times during the first hour to prevent rice from settling. Serve either hot or cold.

Thousand Island Salad Dressing
One-half cup mayonnaise, 4 table-

spoons chili sauce, 1 tablespoon minced celery, 1 tablespoon minced pimiento, 1 tablespoon minced green pepper, 4 tablespoons whipping cream. Combine mayonnaise with chili sauce, celery, pimiento and pepper and chill. When ready to serve add cream beaten until stiff.

Coal is of utmost importance to the drug and dyestuff industries. More than 900 dyes are made from coal tar alone. Mauve was the first of these to be discovered in 1856.

INTRODUCED TOMORROW

THE NEW FORD V-8 FOR 1936

Why do we say The New Ford V-8 for 1936?

What is new about it?

Of course, the newest engine in the low-price car field is still the V-8 engine. Since Ford made it available to all car users (keeping it as economical as cars with fewer cylinders) the Ford V-8 has been the newest engine on the market, and remains the newest for 1936.

You may buy a car on minor "talking points"—some specially advertised feature "with the car thrown in"—but, after all, it is the engine you buy when you buy a car. Hence we put the engine first.

Other new points about the car make a long list.

Its lines are much more beautiful. The hood is longer and sweeps forward over the distinctive new radiator grille, giving the car a length

and grace that are instantly impressive. The fenders are larger, with a wide flare. Horns are concealed behind circular grilles beneath the headlamps. New steel wheels.

Ford upholstery—always of sterling quality and excellent taste—is rich and enduring. The appointments of the car have a new touch of refinement. There is no question about the increased beauty of the Ford V-8 for 1936.

In more practical matters, many improvements have been made—Steering is made easier by a new steering gear ratio. The cooling system circulates 5½ gallons of water through a new, larger radiator. Natural thermo-siphon action is assisted by two centrifugal water pumps. New louvers permit a rapid air-flow around the engine.

Easier, quieter shifting of Ford

gears—The gear shift lever now travels a shorter distance.

The two qualities you want in brakes—Brakes that stop the car with ease and certainty. Ford Super-Safety Brakes of the long-tested, fool-proof, mechanical design.

Safety—as always—in the electrically welded genuine steel body. Safety Glass all around at no extra cost. Hundreds have written grateful letters because this glass has protected the safety of their families.

A car you can drive without strain all day, if you like, in city or country. Steady, holds the road, responds to the driver's touch like a well-trained horse. You don't have to "push" or "fight" the Ford V-8—driver and car easily get on terms of good understanding with each other.

An engine has much to do with the roominess of a car. Very much

indeed. A long engine uses up car space. The compact V-8 engine permits much of the ordinary engine space to be used by passengers.

It really is a great car in every way, this 1936 Ford V-8—the finest, safest, most dependable Ford car ever built. On display tomorrow by Ford dealers.

LOW FORD V-8 PRICES

THIRTEEN BODY TYPES—Coupe (5 windows), \$510. Tudor Sedan, \$520. Fordor Sedan, \$580. DE LUXE—Roadster (with rumble seat), \$560. Coupe (3 windows), \$570. Coupe (5 windows), \$555. Phaeton, \$590. Tudor Sedan, \$565. Cabriolet (with rumble seat), \$625. Fordor Sedan, \$625. Tudor Touring Sedan (with built-in trunk), \$580. Fordor Touring Sedan (with built-in trunk), \$550. Convertible Sedan, \$700.

F. O. B. Detroit. Standard accessory group, including bumpers and spare tire, extra. All Ford V-8 body types have Safety Glass throughout at no additional cost. Convenient, economical terms through the Universal Credit Company.
